

COMDriver TECH

Accredited certification body of Electronic Logging Devices (ELDs) for commercial motor carriers across Canada.

Our Mission

Advance hours-of-service compliance by delivering innovative methods and solutions that improve ELD validation, backed by deep expertise and long-standing industry commitment.

Our Vision

Lead the way in ELD compliance for safety in the motor carrier industry.

Core Values

Impartiality, customer centricity, team spirit, transparency, and innovation.

Proudly Canadian

Locally owned, operated, and independently funded.

Incorporated 2017

65%

of all certified ELD providers in Canada are certified by COMDriver Tech

14+

team members; a mix of full, part-time, and contract

180+

users across COMDriver Tech platform tools

JUNIOR BUSINESS SYSTEMS DEVELOPER

Remote & hybrid; greater YEG area

\$24/hour CAD

Flexible; part-time during term and/or full-time summer

ROLE SUMMARY

Own the discovery of what an internal business app needs to do—then help build it.

You'll talk with users, map workflows, write clear requirements, and keep everything organized as a usable source of truth. Build work focuses on Power Apps (Canvas) and Dataverse.

WHAT YOU'LL DO

- **Discovery:** run short sessions, capture workflows and friction points, produce requirements and backlog
- **Documentation:** write clear how-to and decision notes; keep changes traceable/version-aware
- **Build support:** implement requirements in Power Apps (Canvas) + Dataverse; iterate in small releases

CORE SKILLS

- Strong communicator and writer; you'll write docs people actually use
- Discovery mindset; ask, clarify, prioritize; turn ambiguity into requirements
- Basic dev fundamentals; scripting, programming, and comfort learning new tools quickly

NICE-TO-HAVE

Power Fx • REST/HTTP + JSON • Dataverse Web API
Microsoft Graph (M365) • Solution/ALM workflows
ASP.NET / Blazor exposure
